# Playing With Colour

## Taster Book

This booklet is not intended to be used as a beginners tutor book. It has been designed to give new students the experience of learning to play a few tunes, before making the decision to continue with more formal tuition.

Cover design by Michael Coleman.

## Finding Middle C

The blackkeys on the piano are divided into groups of two and threes.

The middle white key of each group of two black keys is called D.

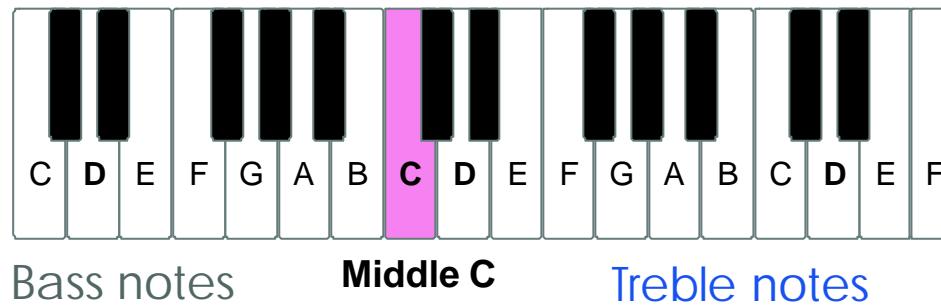

The key to the left of D is C.

Middle C is the C that is more or less in the centre of the keyboard.

Middle C is a special note because it divides the keyboard into two halves.

The notes to the right of Middle C are called TREBLE notes.

The notes to the left are called BASS notes.

Make sure you know how to find Middle C on your piano.

Now let's play!

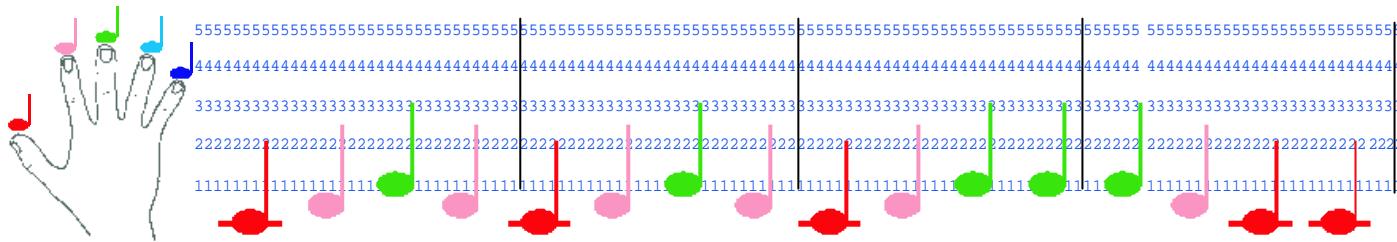

Begin by placing your right hand thumb on Middle C.

Now place one finger on each of the following four notes.

Keep your fingers curved and lift your wrist so that it supports your hand.

Now follow the colours!

### Rolling In The Snow

This kind of note is called a CROTCHET.

It tells us to play WALKING notes.

Make sure your crotchet notes WALK along at a regular pace. Imagine each note is a footstep.

This kind of note is called a  
MINIM

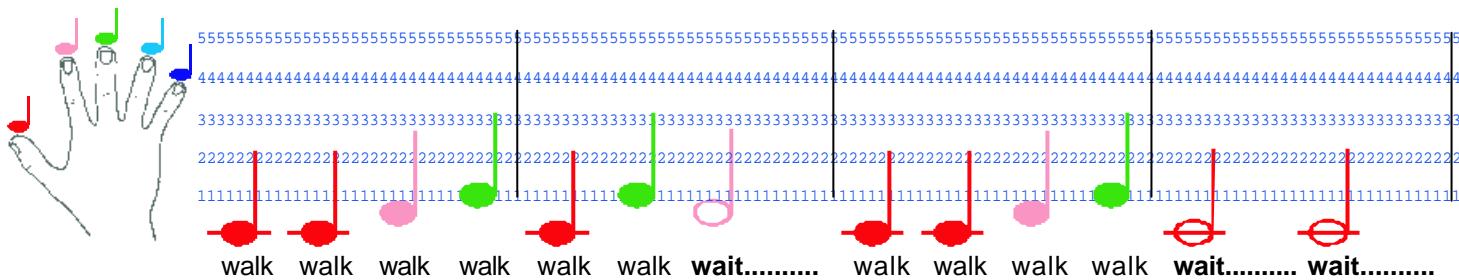

MINIMs are WAITING notes.  
A MINIM lasts as long as  
two CROTCHETS

A note with a line through it  
tells you that you are playing  
MiddleC.

# Yankee Doodle

## Brother Jack

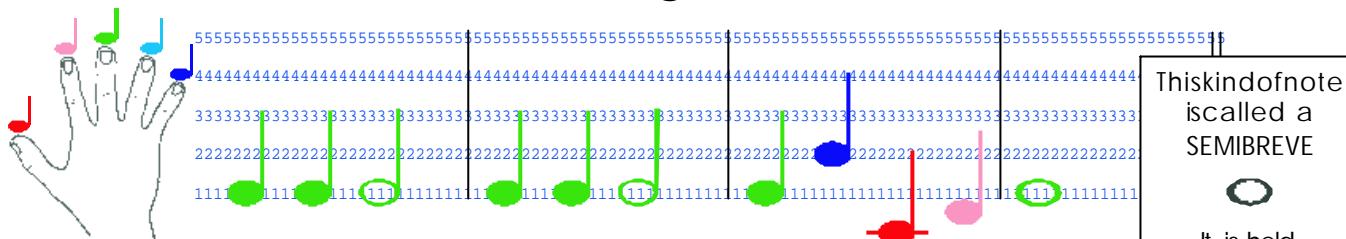

Hand-drawn musical notation for the song "Brother Jack". The notation uses various note heads (red, green, blue) and stems to represent different note values. A hand icon on the left illustrates the movement corresponding to the notes.

QUAVERS are  
JOGGINGnotes.  
They are played a little  
FASTER than CROTCHETS.

## Three Blind Mice

Hand-drawn musical notation for the song "Three Blind Mice". The notation includes various note heads and stems. Below the staff, movement instructions are provided: "walk walk wait.....", "walk walk wait.....", "walk jog-jog wait.....", and "walk jog-jog wait.....". A hand icon on the left illustrates the movement.

## Jingle Bells

A hand diagram on the left shows fingers and thumbs pointing upwards, with colored dots (red, green, blue) placed above them to correspond with the notes in the musical staff. The musical staff consists of four measures of music. The first measure has a red note, followed by three green notes. The second measure has a blue note, followed by three green notes. The third measure has a blue note, followed by three green notes. The fourth measure has a red note, followed by three green notes. The notes are represented by vertical stems with horizontal dashes indicating their duration.

This kind of note is called a SEMIBREVE

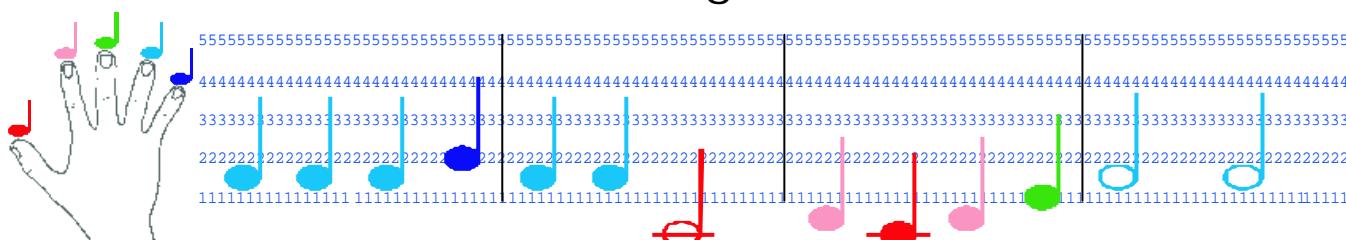

It is held as long as 4 CROTCHETS.

## Oranges and Lemons

A hand diagram on the left shows fingers and thumbs pointing upwards, with colored dots (red, green, blue) placed above them to correspond with the notes in the musical staff. The musical staff consists of four measures of music. The first measure has a blue note, followed by three green notes. The second measure has a blue note, followed by three green notes. The third measure has a red note, followed by three pink notes. The fourth measure has a blue note, followed by three green notes. The notes are represented by vertical stems with horizontal dashes indicating their duration.

## Good King Wenceslas

A hand diagram on the left shows fingers and thumbs pointing upwards, with colored dots (red, green, blue) placed above them to correspond with the notes in the musical staff. The musical staff consists of four measures of music. The first measure has a blue note, followed by three blue notes. The second measure has a blue note, followed by three blue notes. The third measure has a red note, followed by three pink notes. The fourth measure has a blue note, followed by three blue notes. The notes are represented by vertical stems with horizontal dashes indicating their duration.

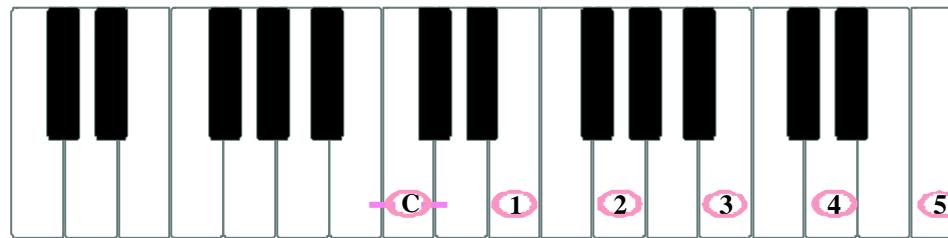

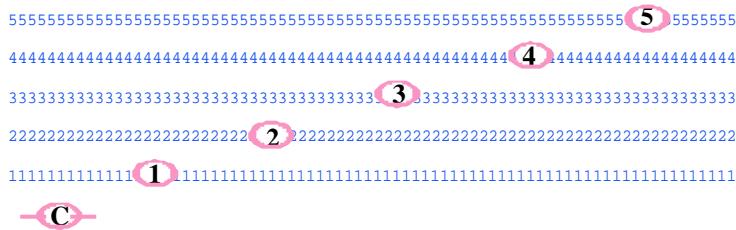

## Moving out of the Middle C position

A STAVE is a set of five lines. The TREBLE STAVE is used to place notes above MIDDLE C.

The notes on these lines can be found by jumping up two steps from MIDDLEC.

Practise playing all five lines with one finger starting with Middle C.

See how quickly you can find each of these lines.

Find and play these TREBLE notes with one finger.

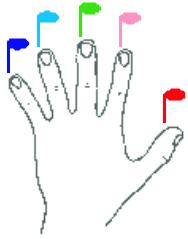

Now you know how to find each of these lines, find line 2, place your thumb on this note, then place one finger on each of the four following notes.

Now follow the colours.

# Happy Birthday To You

Notes are turned upside-down when they are written above line 3. This is only to make the music look tidy; it makes no difference to the way the note is played.

# Playing With Colour

**Playing With Colour** is a series of three tutor books,  
plus a supplementary Fun Book,  
that take children through the first stages of learning to play the piano.  
Book 1 introduces note reading in a simple way, using coloured notation.  
Conventional notation is taught progressively throughout the three books.

By the end of Book 3 children have a  
solid foundation in both playing and reading *without* colour.
